Meeting Jun 21, 2026 at 15:22 IST

Meeting records  Transcript

Summary

The team aligned on developing a custom enterprise system and rebranding the website for better operational efficiency.

Refining Website And Branding

The team prioritized transitioning to a lighter website aesthetic to enhance readability while ensuring authentic imagery and standardized content. Automation via WhatsApp integration will streamline booking processes.

Developing Custom Business System

Leadership decided to build a custom enterprise resource planning system to centralize bookings, track financial performance, and secure staff safety during home services.

Improving Operational Financial Performance

The business will expand services and implement strict walk-in management policies to reach a monthly revenue goal of 100,000 for profitability.

Decisions

Aligned

- **Website design aesthetic** Website design aesthetic is set to incorporate a brighter, white-based color theme to improve readability and professionalism.
- **ERP system development strategy** ERP system development is set to be built internally for under \$1,000 to replace the need for the expensive Odoo ERP solution.

- **Logistics cost pricing policy** Pricing strategy for services is set to include logistics costs within the service fee rather than charging transport costs separately to clients.
- **Website imagery standards** Website imagery strategy is set to transition from AI-generated photos to real, authentic photography of salon work and stylists.
- **WhatsApp booking integration** WhatsApp integration is set to be implemented as a persistent floating icon on the website to facilitate direct booking.
- **Service terminology updates** Service terminology, specifically renaming micro locks to sister locks, is set to be updated in the service catalog.
- **Stylist profile display standards** Stylist booking interface is set to display names and availability only, excluding individual staff photos to prevent perceived workload favoritism.
- **E-commerce aftercare product sales** Website functionality is set to be expanded to include an e-commerce page for selling aftercare hair products.
- **Cancellation policy implementation** Cancellation policy is set to be established with fee structures for late cancellations to protect business revenue.
- **Social media engagement strategy** Customer engagement strategy is set to utilize AI to provide human-like, custom responses to social media interactions.
- **Centralized booking requirements policy** Booking policy is set to mandate that all client appointments must be processed through the company system to be recognized as official sales.
- **System implementation prioritization strategy** The team will prioritize deploying the management system to evaluate operational bottlenecks before attempting to resolve underlying IT or management issues.
- **Commercial engagement terms deferred** All financial and commercial discussions are deferred until the product is stable and the business achieves a higher level of profitability.

We've **updated the Decisions section** using your feedback.

Let us know what you think: [Helpful](#) or [Not Helpful](#)

Next steps

- ☐ [Chethan reddy] Update Website Colors: Implement a brighter color scheme by replacing dark backgrounds with white to improve site clarity and invitation. Ensure all fonts are readable and distinct from the background.

- ☐ [Chethan reddy] Remove Artificial Intelligence Images: Replace Artificial Intelligence generated faces with authentic imagery or simply display names. Focus on removing synthetic human representations to improve brand authenticity.
- ☐ [Chethan reddy] Add WhatsApp Integration: Integrate a floating WhatsApp icon on all pages for direct client booking. Automate initial responses to provide booking instructions when the team is unavailable.
- ☐ [Chethan reddy] Develop Enterprise Resource Planning System: Develop an Enterprise Resource Planning system to manage inventory tracking, payroll calculations, and employee management. Ensure the system handles commission percentages for individual staff sales.
- ☐ [Jacqueline ekumba] Audit Website Content: Perform a comprehensive page-by-page review of the website to identify content errors. Compile all necessary corrections and accurate text into a formal document.
- ☐ [The group] Provide Project Assets: Gather and send high-quality logos, brand videos, and original images to the developer. Provide updated service price lists and detailed service descriptions.
- ☐ [The group] Submit Stylist Information: Compile and submit names and availability schedules for all salon personnel. Exclude staff profile pictures and focus on providing professional availability data.
- ☐ [Chethan reddy] Implement Cancellation Workflow: Integrate a formal cancellation policy into the digital booking process. Configure automated notification systems to send booking reminders and status updates to clients.
- ☐ [Jacqueline] Submit business details: Gather high quality pictures and social media links for all stylists. Compile and share these details with the development team.
- ☐ [Jacqueline] Share financial data: Export and share the existing Excel sheets containing business revenue records and financial data to assist in system building.
- ☐ [Chethan] Build ERP systems: Develop the website and ERP software as discussed. Provide demo videos and updates for feedback.
- ☐ [Jacqueline] Manage social media: Instruct stylists to collaborate on social media posts with the salon account. Enforce this policy through updated employment contracts.
- ☐ [Chethan] Provide documentation: Share information and documentation regarding Scribe Desk with the user.

Details

- **Meeting Introduction and Initial Website Assessment:** Chethan reddy opened the meeting by welcoming jacqueline ekumba and others to discuss expanding the company's website and lead generation capabilities ([00:00:43](#)). jacqueline ekumba noted that while the current website has necessary components, it requires further refinement to match their desired aesthetic.

Chethan reddy began the review by inquiring if the current color theme met expectations ([00:07:45](#)).

- **Website Aesthetic and Inclusion of Signature Services:** jacqueline ekumba criticized the current dark theme, stating it does not amplify their team's skin tones and requested a brighter design with significant white space, while maintaining gold and black as secondary accents. They emphasized that the website must clearly highlight signature services such as African braiding, dreadlocks, and henna, while also attracting non-African clients for services like keratin treatments ([00:09:18](#)).
- **Competitor Benchmarking and Efficiency:** jacqueline ekumba identified nura.com as a benchmark, praising their efficient booking process via WhatsApp or online forms and their transparency regarding stylists and products. They proposed adopting similar features to avoid "reinventing the wheel" but expressed a desire to move away from Nura's current software provider, ODU, due to a high price quote of \$8,000 for an ERP system ([00:10:48](#)).
- **In-House ERP Development:** Chethan reddy proposed building a custom ERP for under \$1,000 to meet jacqueline ekumba's urgent need for a streamlined system. jacqueline ekumba shared a past negative experience with a company called Wistak that resulted in fraud, making them skeptical but desperate for a functional system within the next 30 days ([00:12:04](#)).
- **Logistics and Professionalism in Service Delivery:** jacqueline ekumba expressed a desire for the salon to appear as though it provides full logistic support for home services rather than asking clients to pay for stylist transportation. They argued that transportation costs should be integrated into the service pricing to maintain a professional image and avoid looking "cheap" ([00:13:14](#)).
- **Formalizing Booking Terms and Conditions:** jacqueline ekumba detailed strict terms and conditions used by Nura, including penalties for client delays (100 dirhams per 30 minutes after a 15-minute grace period), cancellation fees, and minimum order values based on location ([00:13:14](#)). They emphasized that these clear terms protect the business and provide a professional communication history via WhatsApp or sales order numbers to resolve disputes ([00:14:25](#)).
- **Addressing Home Service Challenges and Staff Safety:** jacqueline ekumba highlighted the need for a formal system to protect stylists during home services, citing a recent incident where staff were disrespected and stranded after a client failed to pay for their taxi. They noted the current issue where stylists book clients directly on personal phones, making the salon legally unable to hold the transaction liable; they tasked Chethan reddy with creating a system to consolidate all bookings at an enterprise level ([00:15:38](#)).
- **Authenticity in Website Imagery:** Chethan reddy and Rachel W discussed the use of AI-generated images on the website. Rachel W argued that AI often looks artificial on black bodies and recommended using real photos and videos of the salon, wigs, and braiding to provide a "personal feel" and greater authenticity ([00:18:11](#)).

- **Website Design and Functionality Adjustments:** Rachel W suggested that a lighter website theme would feel more "welcoming" and "special," and recommended including stylists' names in the booking process so clients know who they are hiring ([00:20:07](#)). Chethan reddy acknowledged that the initial dark design was based on the logo's colors but agreed to transition to a light mode for better readability ([00:21:16](#)).
- **WhatsApp Integration and Automation:** Rachel W proposed adding a floating WhatsApp icon to every page of the website for direct booking ([00:22:09](#)). They also recommended automating the WhatsApp greeting to provide immediate booking instructions, dates, and stylist availability even when staff are not available to respond manually ([00:23:08](#)).
- **Data Requirements for ERP and Website Refinement:** Chethan reddy requested comprehensive data from the team, including a full list of terms and conditions, stylist details, and availability schedules. They confirmed that they have already built a basic ERP for managing hours and services and requested jacqueline ekumba identify specific features from the ODU demo for integration ([00:24:04](#)).
- **Logo and Branding Finalization:** jacqueline ekumba raised the question of whether their current logo and colors are official, noting they were originally chosen in a rush ([00:25:08](#)). Rachel W and Qasr agreed that the logo itself is acceptable, but that the website version is an AI placeholder; Rachel W tasked Chethan reddy with providing a list of required high-quality files so the branding can be finalized ([00:26:34](#)).
- **Website Content and Service Terminology:** Qasr suggested specific corrections to the website content, including changing "micro locks" to "sister locks" and updating pricing errors, such as a starter rate that should be 300 instead of 150 ([00:27:26](#)). Chethan reddy requested a formal document detailing all services, altered prices, and stylist information to ensure the website is accurate and visually appealing ([00:29:24](#)).
- **Review Process and Workflow:** Rachel W recommended that Qasr and jacqueline ekumba conduct a page-by-page review of the website, providing screenshots and specific corrections in a Word document to streamline Chethan reddy's work ([00:31:27](#)).
- **Automated Booking Notifications and Reminders:** The team discussed implementing automated email and WhatsApp notifications for both the client and the salon upon booking ([00:32:19](#)). Rachel W emphasized the importance of automated reminders (e.g., the morning of an appointment) and a clear cancellation process that mimics platforms like Airbnb to protect revenue ([00:33:01](#)) ([00:38:28](#)).
- **Stylist Selection and Privacy:** Qasr proposed allowing clients to select specific stylists during the booking process ([00:33:01](#)). Rachel W advised using stylist names and availability only, rather than photos, to prevent certain staff members from becoming overbooked while others are neglected ([00:34:04](#)).
- **E-commerce and Aftercare Products:** Qasr and jacqueline ekumba discussed adding an e-commerce section to the website to sell hair care products ([00:35:51](#)). jacqueline ekumba explained that many clients do not know how to maintain their hair, so they want the system to

recommend specific aftercare products based on the service or hair type (e.g., low porosity hair) to help move stagnant inventory ([00:37:02](#)).

- **Financial and Employee Management ERP Requirements:** jacqueline ekumba detailed extensive requirements for the ERP, including tracking inventory with barcode scanning, managing staff commissions (e.g., 5% for referrals or 40% sales splits for stylists), and calculating tiered incentives based on sales targets ([00:41:35](#)). They also requested an investor dashboard to track the initial 580,000 dirham capital investment, rent, utility costs, and visa expenses to automate dividend calculations and eliminate the need for manual Excel tracking ([00:47:36](#)).
- **Social Media Communication and AI Responses:** jacqueline ekumba and Rachel W criticized the current use of impersonal, automated "copy-paste" responses on social media ([00:48:45](#)). Chethan reddy proposed implementing a more sophisticated AI system that uses salon context to generate "humanly written" custom responses to likes and comments, ensuring potential leads are not ignored ([00:50:57](#)).
- **Operational Integration and Stylist Branding:** jacqueline ekumba raised concerns about stylists maintaining personal brands and phone numbers on their social media without mentioning the salon, which makes the business look unprofessional ([00:53:49](#)). They requested a solution where all bookings originating from a stylist's personal page are forced through the salon's central booking system. Rachel W suggested updating employee contracts to mandate collaborative social media posts and requiring receptionists to log all arrivals as formal walk-ins if they are not in the system ([00:56:59](#)).
- **Next Steps and Deliverables:** Chethan reddy committed to revamping the website and building the custom ERP, requesting that jacqueline ekumba provide the Excel data sheets and social media links by Monday to facilitate development ([00:51:49](#)). They also confirmed that the website will include an Arabic language option ([00:52:52](#)).
- **Management of Walk-in Appointments:** Rachel W and jacqueline ekumba discussed the operational process for handling customers who arrive without prior bookings. Rachel W proposed that all walk-ins must be captured at the reception desk to ensure they are integrated into the system. If a specific staff member is requested but busy, the receptionist will mark the customer as a walk-in and they must wait until that person is free in the system, or they can be assigned to an available staff member ([00:58:40](#)). Chethan reddy agreed that establishing this system is critical to identifying whether future issues are technical IT problems or management implementation failures ([00:59:41](#)).
- **System Implementation Strategy and User Roles:** Chethan reddy outlined a plan to automate business workflows using a full-fledged management system encompassing booking, product management, and Enterprise Resource Planning (ERP). The system will feature distinct access levels for super admins, admins, and staff. To initiate development, Chethan reddy requested comprehensive data from the team, after which they will share customer-facing and dashboard website prototypes for iterative feedback loops expected to occur every one to three days ([01:01:01](#)).

- Project Timeline and Developer Commitment:** Chethan reddy committed to getting the initial sites operational within a day and aims to have a stable product ready within a couple of weeks ([01:02:17](#)) ([01:04:12](#)). Their primary motivation is to streamline workflows and provide a high-quality user experience that brings tangible value to the salon's operations ([01:02:17](#)) ([01:12:10](#)). Chethan reddy mentioned they would share further details regarding the "Scribe Desk" by the following day ([01:02:17](#)) ([01:09:47](#)).
- Financial Status and Business Projections:** jacqueline ekumba shared detailed financial performance data, noting that monthly sales started at 20,000, peaked at 80,000, and recently dipped to approximately 69,000 or 70,000. The business is currently not profitable, as 80% of revenue is consumed by salaries and expenses, and jacqueline ekumba has had to use personal funds, specifically their child Sharesa's school fees, to cover rent and investment costs. jacqueline ekumba set a target of 100,000 in monthly revenue to achieve profitability, allocating 40,000 to salaries and 20,000 to expenses to allow for dividend withdrawals ([01:04:12](#)) ([01:08:39](#)).
- Impact of Geopolitical Issues on Clientele:** jacqueline ekumba explained that the recent decline in sales was largely due to geopolitical instability, which resulted in a significant portion of their clientele being sent out of the country on unpaid leave ([01:05:34](#)). With peace treaties now signed, jacqueline ekumba anticipates a business recovery and an increase in customer numbers by September, approximately two months from the meeting ([01:06:42](#)).
- Service Expansion for Revenue Growth:** To address current revenue shortfalls, jacqueline ekumba plans to hire two specialized staff members for lashes and nails, noting that a nearby competitor earns 150,000 monthly from those services alone without offering hair services ([01:09:47](#)). Additionally, jacqueline ekumba believes introducing online bookings for home services will be a key competitive advantage ([01:06:42](#)).
- Commercial Agreement and Partnership Philosophy:** Chethan reddy proposed deferring all discussions regarding commercial fees until the software has successfully scaled the business and reached a level of profitability ([01:07:40](#)) ([01:12:10](#)). They emphasized a desire to build a premium brand identity through professional systems, such as automated feedback links and premium messaging, to differentiate the salon in a crowded market ([01:10:53](#)).
- Market Expansion and Intellectual Property Concerns:** jacqueline ekumba expressed intent to market the "Scribe Desk" product to professional networks, including a nephew's doctor groups in Kenya and a gynecologist former classmate ([01:09:47](#)). However, jacqueline ekumba voiced concerns about potential replication by competitors. Chethan reddy countered that while replication is possible, business success will depend on building reliability and trust, noting that AI is unlikely to replace physical service industries like hair care ([01:10:53](#)).
- Administrative Wrap-up and Medical Consultations:** jacqueline ekumba requested that their father's neurologist be onboarded to "Scribe Desk" following a consultation at the end of the month, which Chethan reddy agreed to facilitate within two days. The meeting concluded with jacqueline ekumba promising to contact their staff immediately to ensure all requested data is sent to Chethan reddy to begin implementation ([01:13:07](#)).

00:00:43

Qasr: What are you doing?

Chethan reddy: Um, hi Jacqueline.

Qasr: Yes, I'm in. I think you wait for me.

Chethan reddy: Oh, hello. Hello. Hello. Jacqueline is joining in.

Qasr: Yeah.

Chethan reddy: Okay. Okay. Okay. Cool. Cool. Uh, let's just wait for her.

Qasr: Okay. gift for a child. I'm using it.

jacqueline ekumba: Good morning.

Chethan reddy: Hi Jacqueline. Happy

jacqueline ekumba: Happy Sunday to you

Chethan reddy: Sunday.

jacqueline ekumba: too.

Chethan reddy: Hey Sh. You got your new hairstyle.

jacqueline ekumba: Ask Ask Ask her why is she tormenting me?

Qasr: Perfect.

Chethan reddy: Why?

jacqueline ekumba: I don't know.

Chethan reddy: Oh my god.

jacqueline ekumba: She torments me.

Chethan reddy: Oh my

jacqueline ekumba: You have the

Chethan reddy: god.

jacqueline ekumba: link.

Chethan reddy: All

jacqueline ekumba: Just one second.

Chethan reddy: right.

jacqueline ekumba: One more person is joining. Please,

Qasr: Thank

Chethan reddy: Yeah.

Qasr: you.

Chethan reddy: Okay. So,

jacqueline ekumba: how are you? How's everything?

Chethan reddy: I'm already I'm already taking a few meeting notes.

00:07:45

Chethan reddy: So, uh it's good. Uh firstly, uh let's purely talk about the website and how how can we expand this and how do we generate more leads by this? Firstly, how how does it look? Does it match our taste or

jacqueline ekumba: Um, almost there. Yes, it has it has the right components that we need and we will get it to where we we want it to be. I don't think it will take much.

Chethan reddy: Yeah,

jacqueline ekumba: So I think you will do you will share your screen as I look

Chethan reddy: that's

jacqueline ekumba: for as I look for

Chethan reddy: I can share my screen now.

Qasr: Please

Chethan reddy: Oh, one second.

Qasr: special.

Chethan reddy: All righty.

Qasr: Lost

Chethan reddy: All right. Cool.

Qasr: their

Chethan reddy: Um, just a second. Okay.

Qasr: father.

Chethan reddy: Uh firstly uh a few questions I'll I'll ask uh with with our uh services that we provide. Um does the color theme looks good? That's what where we have to start with.

00:09:18

Chethan reddy: Is is this what we're expecting or what color theme?

jacqueline ekumba: No, I think the the it it looks too back and

Chethan reddy: Beautiful. Got it.

jacqueline ekumba: for our skin tone to feel amplified within the site,

Qasr: Impossible.

jacqueline ekumba: it needs to be brighter. So, I think we are going to introduce a lot of white, but I don't mind the gold, the black theme, but it's not our official colors. We don't have official colors yet. Um, we've never gotten to that point to decide our theme is this. Our interiors and whatn notes are yes black, gold, white, but then for the website we need to make it brighter. What will look inviting is if everything is very clear cuz right now the font is being swallowed in by the black. Um then we have a few things. Like I said, we are not a typical saloon where you're just booking a manicure, pedicure. Our signature services are the braids, the dreadlocks, the ha, the African styles, but we also want to attract another category of individuals who are non-African and would want the services that we typically don't offer to Africans like the keratins and other services including henna um plus+ um I I had shared with you Um,

00:10:48

Chethan reddy: Got

jacqueline ekumba: nura.com.

Chethan reddy: it.

jacqueline ekumba: So, personally as a saloon owner, I still order my services say Nura Concage. Yes, I still order my services from them. So, it's very easy to get my services and it's done in a very um quick and efficient way. I can book through WhatsApp or I can fill a form online. I will understand who is going to do my service, what product they're going to do. So let's say yeah try let's try nails. They'll ask me what type of nails do I want? Is it a nail spy? Is it nail extension? Is it whatn not? Unfortunately some of this we're going to copy paste because there's no need to reinvent the wheel. Um after which they are powered by a software provider called ODO. UDU is a software in the UAE, but their current pricing has thrown me off. So, we liked everything that they're doing, but they just quoted \$8,000 for the ERP. And as we speak, I'm not very

00:12:04

Chethan reddy: We can we can build a whole ERP under \$1,000 for

jacqueline ekumba: I

Chethan reddy: ourselves.

jacqueline ekumba: So, if we can do what UDU is doing, then that would be very much ideal because I don't have a budget.

Chethan reddy: Let's

jacqueline ekumba: I also invested I also invested in a previous uh ERP by a company

Chethan reddy: see.

jacqueline ekumba: called Wistak and that guy has frauded me and I am I don't know I'm skeptical about the whole thing but I badly and desperately need one right now. I can't take another 30 days to develop one. So,

Chethan reddy: No, no.

jacqueline ekumba: if we can look. So, I don't know how to show you guys. When I booked my service, this is very sensitive because last week we had a scenario where one of our stylists booked a service, went for home service. the client was meant to provide um so usually if you're outside our perimeter you have to do the transport for the stylist to and from but I want to stop that because we look cheap when we say pay my transport.

00:13:14

jacqueline ekumba: I want it to look like the company is providing sorry I want it to look like the saloon is providing the logistic support that the team requires. So the pricing should be within the service that this person is doing to cover all that cost. So now when I book when I when I book um yes we need to add to the price when I book let's say the last time I did gel removal nails gel refill nails and whatn not my bill was 373 dirhams there were terms and conditions for that booking I I had to agree to the terms by placing this order I'm agreeing to the nura's terms and conditions The cancellation is made within a specified time frame. Your service may incur a fee. Please review the full cancellation policy details. Payment is due at the time of service, either cash or credit card. Deposits may apply during peak seasons. Sometimes you have to pay before the stylist can come to you. You, as a client, you're allowed 15 minutes of flexibility before and during the service.

00:14:25

jacqueline ekumba: After this, a charge of 100 dirhams per 30 minutes of delay will apply. Whether you're late, whether your cat is sick, nobody cares. They want their money. They want their money. A minimum order value may apply based on your location as indicated in the sales order address. Um, if you are booking a gift card or a policy, please review detailed gifts and package policies. Then there's a communication history. If I talked to them on WhatsApp, they have a sales order number on that WhatsApp chat where in case of any dispute, you can use that to view the time sheets of this specific order and avoid unnecessary back and forth. So, they've streamlined their booking um uh their booking procedure in a way that you as a client you feel safe doing it. they are having ease of business at the end of the day. So currently we are only relying on the walk-ins or the people who have booked us through social media and are coming to the store whilst there is a larger category of individuals or or clientele who are at home and they want to receive the services at the comfort of their of their home.

00:15:38

jacqueline ekumba: So I need us to introduce um a concept where I'm targeting both walk-ins and home service clients but in it must be at the safety of my buticians as well because that scenario that my my my team faced they were disrespected. They were not handled with respect because this person feels you come from this non good area of Dubai. I don't care. That's a lot of money that I've paid you already.

Chethan reddy: Got

jacqueline ekumba: So how how do I move?

Chethan reddy: it.

jacqueline ekumba: So another issue is this client booked the stylist directly on her phone. She didn't book the client the the service through the saloon. So for for the only way I can hold that transaction legally liable is if it's booked through the company. How do I do that? If most of the bookings are being done in the stylist's personal phones. How do I streamline and make this a proper business and avoid such misunderstandings or unnecessary um inconveniences because that was a huge inconvenience at at around 11. They were stranded because the the lady ordered the taxi charge without

00:17:00

Chethan reddy: I'm

jacqueline ekumba: paying. So they had to figure out where are we getting money from? Oh, then we've lost our money. What are we what are we doing? Where are we starting from? Yet they were 30 minutes away from their usual

Chethan reddy: understood.

jacqueline ekumba: spot.

Chethan reddy: No, I think uh we can consolidate uh we can consolidate the whole booking uh standalone that okay whenever a booking is being done uh it is being done in a proper enterprise level manner with all the terms and conditions uh possible. If tomorrow they're going to come us and say that this was not uh uh yeah this was not uh know in terms of what we were expecting and all we can just directly show them the terms and conditions. Uh that is what they have agreed with uh in their order ID the PDF or the link or whatever we're going to send. Oh wow cool. Yeah we can beautifully generate stuff uh uh like this.

jacqueline ekumba: like that.

Chethan reddy: Yeah, we

jacqueline ekumba: So, I'm just showing you one week later, the sales order is still very much active.

00:18:11

jacqueline ekumba: If I want to go back and check what did I do,

Chethan reddy: can.

jacqueline ekumba: how did I do it, it's still there. yet other so the I've I've I've tried to book with different salons to see what they're doing and how they are doing it in order for me to improve myself and they are standing out currently and the only reason they are standing

Chethan reddy: Sorry.

jacqueline ekumba: out and all their images are also AI um generated. I would want to make mine different by using um like I I want a personal feel to it and let it look

Chethan reddy: real

jacqueline ekumba: real.

Chethan reddy: understood. No, no images. Uh, these are all AI only. These are all AI. No,

jacqueline ekumba: Yeah.

Chethan reddy: we can also use I mean it totally depends. We got to use a mix of

Rachel W: But you know you know AI on white bodies looks very different from

jacqueline ekumba: All

Rachel W: AI in black bodies. AI in black bodies is obviously AI and that's why I think we should use is obviously

00:19:09

jacqueline ekumba: right.

Rachel W: AI because especially look at the the the sites where you've done for classes and look at the braids that is obviously air. You can see it we can tell you this one is very difficult to

jacqueline ekumba: Yeah.

Rachel W: tell.

Chethan reddy: This this looks more AI because

Rachel W: Yeah. Yeah. Yeah. So, and also being in a black in a black site,

Chethan reddy: it's

Rachel W: um it it it accentuates the AIS of it. Um but I'm sure the coms person is here just and uh they can give you photos cuz I'm sure there's a wig photo, there's a braiding photo, the hair photo can stay, you see, because then probably unless you have unless you have a white person, I don't know, but it will be it will feel real more real with actual photos. Even the video, you can have a video um at the landing page if you want of the salon itself.

Chethan reddy: Yeah.

Rachel W: Yeah.

jacqueline ekumba: Yeah, which we do

Chethan reddy: As

Rachel W: Yeah.

00:20:07

Rachel W: So,

Chethan reddy: long

Rachel W: I think it's just sending them to each other.

jacqueline ekumba: have.

Rachel W: How do you say your name? No, let him say

jacqueline ekumba: Yes.

Rachel W: it.

jacqueline ekumba: Ready.

Qasr: What is it? Eat

Rachel W: All right.

Chethan reddy: E anything works doesn't matter.

Rachel W: Cool.

Qasr: them.

Rachel W: No, no, no. People's names must be respected. It's your identity, who you are. Um, so yeah, I think maybe if you do the the websites are more uh more white. It will look more special and stuff and just change the photos.

Chethan reddy: Definitely.

Rachel W: Yeah. And also what I noticed is that this the Kasar one right now you've done I think you've done a lot in the short

Chethan reddy: Definitely.

Rachel W: time but also what's what is in Nura Nura um they

jacqueline ekumba: Yeah.

Rachel W: have the they also have the stylist's names on the booking so you know who you're booking and I think yeah and that will help I think in that um where she was saying that she doesn't some people are using the personal phones so if they have their names there you can find.

00:21:16

Rachel W: You can see who's booking who and their customers can book them through their name and they should be

Chethan reddy: Beautiful.

Rachel W: fine.

Chethan reddy: Understood. So the main reason why the website looks this dark and to us Jacqueline initially of course

Rachel W: Yeah.

Chethan reddy: when we had the discussion we did not go this deep right. So we were just we were like okay let's target the logo use the

Rachel W: Ah yeah yeah yeah.

Chethan reddy: logo.

Rachel W: And I don't know why she's saying that's not her colors because they are. It's just that sometimes as a website you don't want dark mode. You can put the dark mode there somewhere. But I think for a welcoming website, light mode is better. Especially with a lot of information. Yeah. Like this one. See, it feels like you can breathe. And also one thing I like about them is that they have that WhatsApp thing cuz some people especially our people from the African continent, they really love this WhatsApp.

00:22:09

Rachel W: I don't know about you guys, but if the WhatsApp thing, you see how you go to other websites and the on the bottom left or bottom right is the WhatsApp side and however whatever page you scroll to, whatever thing you do, it's just there. It's like a constant situations. I don't know cuz I see it. I see the WhatsApp you put it at the bottom of the

Qasr: Easy.

Rachel W: page.

Chethan reddy: Understood. Uh, so we want to put the WhatsApp as a floating

Rachel W: Yeah.

Chethan reddy: icon.

Rachel W: The floating icons that it can move from page to page. Yeah,

Chethan reddy: Yeah. Yeah.

Rachel W: cuz right now it's at the right now it's at the bottom of the

Chethan reddy: Cool.

Rachel W: page.

Qasr: Okay.

Rachel W: It's there,

Chethan reddy: I'll make a note.

Rachel W: but it's just at the

Chethan reddy: Yeah. Yeah. Yeah.

Rachel W: bottom.

Chethan reddy: WhatsApp as a floating icon for direct booking.

Rachel W: Yeah.

Chethan reddy: Yeah.

Rachel W: But then also I feel like I feel like there's um there's apps now where when they click that WhatsApp they're not talking to somebody per se, but they're talking to uh you've set up I don't know you you're the one who knows this.

00:23:08

Rachel W: I think they set it in a way that when I click the WhatsApp icon, um it takes you to the WhatsApp, right? But then it says, "Hi, welcome to Kasha. We're not here right now, but here is how you can book your services. Can you do that?" So that they can get the same thing on WhatsApp.

Chethan reddy: Yeah.

Rachel W: Yeah. Like they book the date, the person, the time. just a simple form that they can do on WhatsApp feeds back to the website or to the basket I don't know how you call it you you know you I think you understand yeah

Chethan reddy: can can automate that as well. Definitely.

Qasr: That's

Chethan reddy: See main thing

Rachel W: that's yeah because even no I'm saying because that automation is

Qasr: not

Chethan reddy: is

Rachel W: important because these guys they don't respond to messages really fast and that that leaves a few people on the way Right.

Chethan reddy: Yep. Yep. Yep. Understood. Understood. No, the 100% we can do that as well.

00:24:04

Chethan reddy: Uh but uh the main uh uh problem is I need a lot of data from you guys to be honest at this. Uh I wanted the terms and conditions uh list.

jacqueline ekumba: Yeah.

Chethan reddy: I can definitely copy it from the Nura itself. But of course uh you guys have to give me the stylish details, their availabilities and all things. By the way, I haven't shared you guys the admin uh uh page. So there is an admin page as well like who are all booking and all that stuff. Uh I'll revamp this whole thing as well but everything will be handled.

Qasr: answer.

Chethan reddy: Uh Jacqueline the ERP system that you're talking about uh the ODU has proposed right I've already built a simple ERP for ourselves like setting up the hours for adding people services etc. So we can definitely improve. Uh what are all the features that were demoed for you that are useful for us? I'll just integrate those features in our ERP

jacqueline ekumba: Perfect.

Chethan reddy: system.

jacqueline ekumba: Do you want to book a demo call with them to see what they're offering so that you see what you're building?

00:25:08

jacqueline ekumba: That that's another way around it. Or if you can just go to their website. Let me see what I have from them because they had

Chethan reddy: Mhm.

Qasr: I'm just tired.

jacqueline ekumba: suggested

Qasr: You're tired? Yes.

Rachel W: Our gift is

Chethan reddy: Oh,

Qasr: I said my

Chethan reddy: just

jacqueline ekumba: If you can speak,

Qasr: voice this

jacqueline ekumba: we can hear your background, but you're saying nothing.

Qasr: No.

jacqueline ekumba: Say something.

Qasr: Okay. So, I want to talk about the point that I have like I have here. So, you've already spoken about the the logo. I think

jacqueline ekumba: Um, so the the the Thank God, thank God Chatan is here.

Qasr: the

jacqueline ekumba: So when when Casser was being birthed, we were doing everything in a rush and we needed to just have something to show that we're existing and we did that. We chose the colors together. But is is that our official logo? Is that our official color? That's a decision we all need to make today.

00:26:34

Rachel W: That is the decision. That is the G where the logo is fine.

Qasr: I think the logo is

Rachel W: We're there. This it's a small thing right now.

Qasr: fine.

jacqueline ekumba: Huh?

Rachel W: You need the the the site to work and all all he has to do is just change the black

Qasr: But what I mean is

Rachel W: background into white and he's he's going to do that. You'll be fine. So you'll have white, black, and elements of gold.

Qasr: a second.

Rachel W: Yeah,

Chethan reddy: Got

Rachel W: the logo is okay for

Qasr: So what I was trying to Okay,

Chethan reddy: it.

Rachel W: now.

Qasr: so what I was trying to say is I think the logo there is not our logo.

Rachel W: Ah, yes, because it's a what you call it? It's the AI one. So we need to give uh the the logo,

Qasr: Okay.

Rachel W: the everything. So he's not put a logo, he's just put the name because he doesn't have those files. So I think what he needs to do is give us a list of what he needs like a very thorough list and then you

00:27:26

jacqueline ekumba: Yeah.

Rachel W: can and then you can send those things to him ASAP so that he can continue because he's very hospital.

Qasr: Okay. And second one is um in place of the Dubai home in place of Dubai's home blah blah blah I think it should be changed. Yes.

jacqueline ekumba: and obviously we'll change

Qasr: Okay.

jacqueline ekumba: that.

Qasr: And um sister lock that for

Rachel W: But to be changed to what?

Chethan reddy: Don't

Rachel W: To be changed to what? You need to be you need to be very okay. Okay.

Qasr: me.

Chethan reddy: don't keep things for later. Shout it out in the meeting.

jacqueline ekumba: But wait, I I have a question.

Qasr: Okay. Exactly.

jacqueline ekumba: So I I this call has very um very very

Qasr: Your shoes

jacqueline ekumba: important people. Um by that I mean you're all gifted in different ways.

Qasr: off.

jacqueline ekumba: I'm not the creative. If there's anyone who needs to provide what that homepage needs to read, it's the DJ. It's not me.

Rachel W: It's not me either.

00:28:23

Rachel W: It's you.

Qasr: Okay.

Rachel W: It's gift and that's why gift is giving you because gift is in charge of forms and grand and and lu and everything.

Qasr: What

Rachel W: So I think as as said we don't don't talk about it because otherwise we'll stay here for another

Qasr: happened?

Rachel W: month. Just send the things now. If you see something is wrong,

jacqueline ekumba: Yeah.

Rachel W: just send it now. And he'll also give us a list to do.

Chethan reddy: Okay. By the way, guys,

jacqueline ekumba: I I I I I will support fully on the ERP because I know what I need and how I need

Chethan reddy: you

jacqueline ekumba: it.

Qasr: Mhm.

jacqueline ekumba: Gift and I gift I can give you a level of support on what the brand needs to look like, but that that should be that should be on you. You need to take some weight.

Qasr: Okay. And I think instead of the micro locks, you should change it to, you know, you want locks, you should change it to sister locks.

00:29:24

Qasr: No, no.

jacqueline ekumba: So now this this these terms of these names.

Qasr: The language they

jacqueline ekumba: Yeah. So we need to change th this these terms or those names

Qasr: understand.

jacqueline ekumba: into we need to have a document that reads all those services in detail because Chan does not know what logs

Qasr: No,

jacqueline ekumba: are.

Qasr: the way he has put it is okay with the prices. Okay. So with the sister locks I think you have to give him the only the price are all okay but um I think it's supposed to be 2 and the rate touch is 300 and the starter you

Chethan reddy: guys.

Qasr: wrote 150 which is supposed to be 300 and the in in the

Chethan reddy: Yep. Yep.

Qasr: treatments if you can bring a column where we can have um live in like we have two types of treatments okay where the customer can choose

Chethan reddy: Understood. No,

Qasr: Is You get

Chethan reddy: it can it can be customized as much as we want. The only thing is I want from you guys is uh beautiful.

00:30:23

Qasr: it.

Chethan reddy: all the shout out all the suggestions like the way you are giving so that the Google notes is taking all all the

jacqueline ekumba: Yes,

Chethan reddy: pointers but apart from that the information I need is fully the services and the prices list if there are any altered one Jacine shared me some rough onepage list which I took and try to put it on the uh website you guys share me that you can share me the stylist all the stylist details it need not be very structured a rough a rough document is enough with some type information about them that's more than enough to integrate all those details and all uh logo you can give me high quality logo highquality videos highquality pictures the more data that you give the more beautiful the website will be and the more uh people will be clicking on making

Qasr: Okay.

Chethan reddy: the bookings and all that stuff with respect

Qasr: Okay. I'll shut

Chethan reddy: please yeah

jacqueline ekumba: I have a question.

Rachel W: My hand was raised. Everyone should raise their hand in this meeting.

00:31:27

Qasr: me.

Rachel W: Yes. Thank you. Um, so I think I I I I am a great supervisor. I don't like to work. I can also I feel like uh just you should go through the website step by step from from from homepage to every single page and see what uh what has been done and if the thing is really just ask him um you can screenshot and say here we need this and put it in in a word document um this we need this this we need this you understand for that because uh um S doesn't doesn't know what all these things are but if you look at the site because it's already built well. You can go page to page and say this is wrong, this is right, this is wrong, this is right. And when you're saying this is wrong, you give you give what is supposed to be there.

Qasr: Okay.

Rachel W: And that's that way you will make his work so much easier and faster cuz he doesn't know. Of course, he doesn't know.

00:32:19

Rachel W: Even me, I will go there and I won't know why.

Qasr: Okay.

Rachel W: Why is why is we and we starting at 50? I don't know. You understand? But you because you work there every day, you know, you can just screenshot and say this is wrong. Uh this is the correct wording. This is so yeah and then it will be much easier for him.

Qasr: Okay.

Rachel W: Um

Qasr: Okay. And I wanted to ask a question that um is it the booking side that uh can we have let's say if

Rachel W: yeah.

Qasr: the um the client books can it automatically send an email the client enters his or email will it send an automatic

Rachel W: Yeah. Yeah. Yeah. It should send an it should I think even right now it can do that once they book then you'll get an email

Qasr: message

jacqueline ekumba: and WhatsApp

Rachel W: at the through to uh email. I don't know what's up if he can do it but he he'll tell us but the email immediately they book you'll get a

00:33:01

jacqueline ekumba: up.

Rachel W: notification and that can go two ways you can get the notification to you and the notification to the customer that they have booked on this day you can even do reminders I think they have that option the reminder so if the

Qasr: Okay.

Rachel W: customers booked to come let's say on Tuesday at 5:00 p.m. on Monday on Tuesday morning at 1:00 p.m. at 1 at maybe 10 a.m. They send out the the the machine sends out an email for a reminder and it also sends to you a reminder.

Qasr: He has those words.

Rachel W: So I don't know if that is possible but I've seen it in other sites.

Qasr: Okay.

Rachel W: to uh Javanella.

Qasr: Okay. Yeah, I think Maki also wanted this. Um, let's say after the client is done booking where he or she can select the stylist he or she wants. So, I'm going to share with you the pictures. Okay. And then H after you select. So, I think I don't know if you can have maybe if it's a new client who doesn't know any of the status, you can make you can have an option like

00:34:04

Rachel W: Yeah, I think it does have that even the other most of them have that any and you don't need pictures just names and their availability. So let's say gift is available Monday, Tuesday, Wednesday, Thursday only and available at this time.

Qasr: Yeah. Okay.

Rachel W: Don't put people's pictures on your site.

Qasr: So, I'll send all those to you

jacqueline ekumba: Oh no.

Rachel W: Just put their name because because it's encouraging whatever. What if I don't look great and everyone wants to go for life?

Qasr: inside.

Rachel W: You find that some people are over books than others. But if you just put names, people can choose a name and once they figure it out or they choose any and then once they go they know ah my service was done by gift and now I only want gift moving forward. So they can book gift. But if you put a name if no put their names no images even this guy know I don't put their images just put people yeah you see the site is now more alive is there working giving us white whatever's okay I'm done speaking Next.

00:34:56

Qasr: These are the

jacqueline ekumba: Okay, I have a question. Yeah, that's a very that's a very good feedback because I actually thought about it because currently we have a

Qasr: one

jacqueline ekumba: complaint that Sarah is over booked. We have a complaint that Sarah is favored. Now we want to put her picture again and the Thank you for that point Miss Ray. Now the question is this. Is it possible for you to share the man cave URL so that we can look at what it looks like? Can you put it on the chat so that we can use it also for some ideas?

Rachel W: Yeah. Yeah, that's why I save. Let me It's not even month. It's month, but it's fine. I'll give you month. We moved.

jacqueline ekumba: monthly.

Rachel W: Everyone moved. Um, one second. Let me do that right now. Um, you continue talking. Look, look at the site. The site is now white. See how how much difference that is.

00:35:51

Rachel W: I'll find the

Chethan reddy: No, I I was just locally I was just locally playing to see how how it might look like. Anyways,

Qasr: I also have an um I was also thinking if you can also display some of the products

jacqueline ekumba: Mhm.

Qasr: on the I don't know if you should do at the booking section and put in the usage like the importance of it. Your clients can go to they want to buy also that with the prices.

jacqueline ekumba: So the idea that I had was simple. Most people do not know how to take care or the aftercare of a style or their hair type.

Qasr: I said

jacqueline ekumba: So one of the biggest shifts we need to do right now is when you're booking a service, when you're doing a brief consult with your client,

Qasr: money.

jacqueline ekumba: before you give the client a service, you need to be able to say for low parocity here, here are the products. So maybe can we so the the goal I had before was can we have um some of the products that we recommend to our clients at a at a at one page where they can actually buy.

00:37:02

Qasr: Anybody

jacqueline ekumba: So that's introducing an ecom um an ecom page within the website so that some of the products that we have can

Qasr: else? No.

jacqueline ekumba: Yes. Uh some of the some of the some of the what some of the products that we have in house can be sold online as well because we are currently we we we currently have a lot of stock and it's not moving and we need it to move. Yes. So that that part we need to we need to see how to do it because I want that I sell a product after every service because you need to do an afterare of that style. So while a website is just a website for booking and whatnot I want people to see that there's afterare requirement or recommendation from our side.

Chethan reddy: Yeah, understood. Can do

Qasr: What?

Chethan reddy: that.

jacqueline ekumba: Um m um Miss Ray has given us Can we can we can you click on the URL

Qasr: Thanks.

jacqueline ekumba: please?

Chethan reddy: What is this?

jacqueline ekumba: So this

00:38:28

Rachel W: So it's a salon service.

jacqueline ekumba: was

Rachel W: It's it's a salon service that these guys use. Mostly barbers in Kenya. They use that. So don't even click on that. Just click I think yeah if you add add a haircut add that coins and then so basically what

Qasr: check.

Rachel W: you're doing is you see how the names are no preference and then you can prefer you can prefer whoever look at the availabilities. Uh look at time.

Qasr: That's

Rachel W: Yeah. Book now. And then it will ask you for details.

Qasr: where you

Rachel W: So you've done it and now they will start calling you with that fake n cuz very soon you'll receive an email. Very soon you'll receive if that email works you'll receive something. And I don't know if you can cancel and and maybe if you go to your email and see if you can

Qasr: Watch out

Rachel W: cancel cuz cuz then a cancelling a cancellation

Chethan reddy: Let me check. One second.

00:39:23

Qasr: for

Rachel W: thing would be very important. Um if someone is just trying to play with the site otherwise you'll

Chethan reddy: I did not get

Rachel W: have uh pro under promotion uh

Chethan reddy: it.

Rachel W: refresh and see it's coming.

Qasr: Please

Rachel W: the view.

jacqueline ekumba: Yep, you got Man

Chethan reddy: Man matters is my

Rachel W: No,

jacqueline ekumba: matters.

Rachel W: no, no. Man's face. Man's face. So, he's not got it. I don't know why, but he'll get it eventually,

Chethan reddy: product.

Rachel W: I think. Um cuz I know I know they'll send either they'll send a message or

Qasr: find the egg.

Rachel W: something. What What number have you put? If we go back.

Qasr: Please.

Chethan reddy: But that's an Indian Indian number I

Rachel W: If you go back, that's it. Yeah.

Chethan reddy: think.

Rachel W: Yeah. Okay. If you can really live just Yeah.

Chethan reddy: That's okay. Yeah, I

Rachel W: They'll be fine. So, but basically what you need to learn then therefore from this experience is that that email needs to come

00:40:24

Chethan reddy: mean

Rachel W: instantly or if it's a message, it needs to come instantly. Um and also we have to do a cancellation a cancellation process uh whatever that means whatever that looks like so that maybe you can cancel if if you don't cancel within

Qasr: Good

Rachel W: 48 hours we didn't we didn't charge you or something or or if you cancel

Qasr: afternoon.

Rachel W: after after your your your date like how the booking.com or Airbnb does if you if you if you cancel your booking they still have your details so they'll still take their their always does.

Chethan reddy: Understood.

Qasr: be on

Rachel W: Yeah.

Chethan reddy: Got it.

Qasr: there.

Chethan reddy: Can do that.

jacqueline ekumba: That's

Chethan reddy: Can do that. Okay. Uh

Rachel W: Yeah. Yeah.

jacqueline ekumba: really

Rachel W: But obviously I like I really like what you've done so far in such a short time.

Chethan reddy: so

Qasr: Okay.

Rachel W: So congrats.

jacqueline ekumba: It needs to be downloaded.

Chethan reddy: Okay. So um I have taken everyone's uh uh back.

00:41:35

Chethan reddy: So Jacine you have also given me this ERP requirements. I think uh this is also good enough for me. This is more than enough for so this is

Qasr: Oh my

Chethan reddy: more than enough for me.

Qasr: god.

Chethan reddy: I'll take this as a requirement document to build the complete uh ERP. I think uh uh do you need everything like accounting features uh all these features as well?

Qasr: That's

Chethan reddy: There are any specific features you

Rachel W: I think Jackie is not doing other things.

Qasr: what

Chethan reddy: need

Rachel W: He needs to mute herself. I feel like if if you can do that um on the in the back what what do you call it? Back back end. Back end. Yes. If you can do some of these things cuz some of these

jacqueline ekumba: gift. Mute yourself.

Rachel W: things.

Chethan reddy: I I'll just mute once again. Sorry. Yeah, tell

jacqueline ekumba: I think it's gift.

Rachel W: No,

jacqueline ekumba: Um,

Rachel W: I'm saying she's back here now so she can speak for herself.

00:42:28

Chethan reddy: me.

jacqueline ekumba: so I'm here now on the ERP side. This is very sensitive because currently we are on Excel and it doesn't give us ease of business. Then we need the ERP in order to do several things including employee management, financial management, um inventory which is one of the main um headaches that we have currently. So every service, for example, braiding, you need to have um stock of specific hair extensions that we bring in from out of the country. So I've been doing a personal

investment for those products and I need to sell in order for one minute. I need to sell in order for the service to happen. So one of the core requirements for this ERP is inventory tracking. So from the point where a requisition is done because currently if somebody chooses black extensions we have a stock room where you bring the the product from the stock you scan the barcode and you include it in the sale of that client.

Chethan reddy: Correct.

jacqueline ekumba: So we we need an inventory part from from requisition of the main stock

00:44:00

Chethan reddy: Correct.

jacqueline ekumba: that is required for a certain duration to when we are selling it to the clients and we are also selling to other saloons. So if I have a proper ERP in place, the ecom part will become a bigger ecosystem where I'm supplying other saloons with some of these products because they don't have

Chethan reddy: Understood. ERP might

jacqueline ekumba: number. Yeah. Number two,

Chethan reddy: help.

jacqueline ekumba: on the financial end, not everyone is salaried. I have a staff who stands outside with printed brochures and flyers and her sale currently is at 10,000 dirham from calling people to come in the shop. I track such numbers because whatever she's doing is very important because currently the sales are

Chethan reddy: None.

jacqueline ekumba: very low but she's still bringing in the numbers. So like this stuff is salaried. She has a basic salary and a 5% commission from every sale that she brings. You understand?

Chethan reddy: I'm

jacqueline ekumba: No. 5% of the total she brought in that month. So I need the ERP to be able to calculate from the minute um so let's say Miss Ray came in as a client.

00:45:24

jacqueline ekumba: She was referred by her code is called Amizo. She was referred by code Amizo. The minute Miss Ray pays 200 5% is is allocated to Amizo. So that end of the month I simply print out

the report and it gives me what I need to pay out. I don't need to calculate and look for who did this, who did that. Every stylist um so every stylist, so I have some who are on 40% of their current sale and the saloon takes 60%. This will continue as long as the sales are less. But once we get to a level where Dubai is back to business and we are stable, I'll move them to salaries, then I will introduce incentives where the employees can earn based on the target mark they reach. So let's say currently I have a staff who earns um 5,000 dirhams. uh basic maths for an employee to earn 5,000 dirhams you need to bring you need to bring in sales worth three times that amount is the employee reaching those targets not

00:46:30

Chethan reddy: Got it.

jacqueline ekumba: yet does this employee have that potential very much so I want to introduce incentives where this employee

Chethan reddy: Got it.

jacqueline ekumba: sees how because some of them do not see what they can do while I try to encourage and apple believed they've not gotten to a point where they are seeing what they are doing or what they building cuz at the end of the day they just think it's a job I earn my salary end of the day it's gone

Chethan reddy: Got

jacqueline ekumba: the bigger picture that I see with such individuals is if I can grow this individual for

Chethan reddy: it.

jacqueline ekumba: them to get to a point where their sales are that high you earn well you have an incentive and when we are growing because when when the sales are high then you can scale the business when we growing. I can get to a point where I'm allocating I'm allocating more than the incentive.

Chethan reddy: Correct.

jacqueline ekumba: The first the first time someone gave me 1% equity that encouraged me. Am I going to do that right now?

00:47:36

Chethan reddy: Correct.

jacqueline ekumba: I haven't gotten to a point where that is being considered yet. We are still very much behind because everyone wants their money and they want their money. Whether you have money or they you don't, everyone wants money. you have to give them money. You understand? But when I get to a point where the business is running itself, the staff are doing what they're supposed to do, the incentives will go beyond a 5% a 10% or a 20% whichever. Now,

Chethan reddy: Understood.

jacqueline ekumba: one of the most important components of the financial part of the ERP should be the financials on my side. As an investor, I want to see that I put in capital of 580,000 dirhams. I have spent x amount on rent. I spent x amount on utilities. I've spent x amount on visas. Every month, these are the uh monthly uh these are the revenue records that we have. I want my system to be able to tell me in 3 months you should get a dividend of 5%.

00:48:45

jacqueline ekumba: you should get a dividend of 20%. If I can do that, then it will mean I'll close my laptop and I don't need Excel because currently I have everything manually done on Excel and it's a lot of work for me because I'm overwhelmed and no one can do that.

Chethan reddy: What's

jacqueline ekumba: So essentially I was to get one of my staff to a point where they manage the business. They're running the business um to a level where revenue is being generated. The company is moving on its own. All I'm doing is looking at the financials and seeing where we need to do an investment in order for us to grow and scale to a a different level. But that is not happening.

Chethan reddy: I miss

jacqueline ekumba: So I need the ERP to do that for me currently.

Chethan reddy: you.

jacqueline ekumba: Then we will move from this point to another point. One of the one of the most painful feedbacks I received from Miss Ray

Chethan reddy: Wait.

jacqueline ekumba: was I hate it that when I like a comment on social media, there's an auto response of hey lovely do you want to book us?

00:49:54

jacqueline ekumba: Text us on this number. And it's the same message to everybody. Who did that? I did. Why did I do that? Because the person handling the socials is missing out on the messages. So now where are you?

Rachel W: And I was like remove that remove that because it's so impersonal you know like

Chethan reddy: Okay.

Rachel W: like has come here and said oh how much is booking hair stylist and then he

jacqueline ekumba: Yes.

Rachel W: gets a message. I love me.

Qasr: It's removed. It's removed.

Chethan reddy: We can we can have responses via AI.

jacqueline ekumba: So yeah.

Chethan reddy: We'll

jacqueline ekumba: Yeah. So one of now now one of the most important parts of your solutions would

Chethan reddy: discuss

jacqueline ekumba: be when she's not on the phone. We still need to respond when we get a like. I'm not sure how the algorithm works because before I was told you don't have to follow everyone. Then someone else says, "When somebody follows you, follow them." I'm not sure what works,

00:50:57

jacqueline ekumba: but I'd want I'd want the audience that we currently have not to feel like they're being ignor

Chethan reddy: Okay.

jacqueline ekumba: ignored. Does that make any sense to

Chethan reddy: No, got it. Got it. Got it. Um,

jacqueline ekumba: you?

Chethan reddy: no, that's what I'm saying, right? uh we should build a system where we have enough context of our saloon to that system and it has the enough context on the person also and then it makes a humanly written custom responses for them that hey this is out this is out if you I should feel like someone actually a single person is reaching out from the responding to them we can we can

jacqueline ekumba: He's responding to them.

Chethan reddy: definitely that's what I told we can definitely move towards uh uh that part that's one cool experiment I really

jacqueline ekumba: Yeah,

Chethan reddy: want to see how it works. I have done it on LinkedIn for posting my social media.

jacqueline ekumba: I know. I saw I saw

Chethan reddy: So I've also done it for one of the businesses in US.

00:51:49

Chethan reddy: We have done it for uh LinkedIn comments not Instagram comments but nonetheless both are same. It's it's just LinkedIn is used for some professional stuff and social media is used for social uh related things. So we can definitely see Jacine my thing is um I mean thank you very much. of we have so many things jotted down now. Uh we we'll get started building one by one.

jacqueline ekumba: Yeah.

Chethan reddy: Let's fix the site first and have a basic ERP in place.

jacqueline ekumba: Yeah. Yeah.

Chethan reddy: I'm going to throw you the ERP and the site for all of you guys.

jacqueline ekumba: Yeah.

Chethan reddy: Uh right now whatever information that we have discussed let it be with the stylist salons your ERP requirements are noted in my Google meet notes.

jacqueline ekumba: Mhm.

Chethan reddy: I'll take care of them. And also this odo uh document you have shared is more than enough for me to understand the I don't need anything but from your staff if it would be great if you could get all the details the high quality pictures everything being dumped into the group that we have or share me some links so that I can put them on the uh uh website and of course thank you very much for giving the initial feedback I

00:52:52

jacqueline ekumba: Mhm.

Chethan reddy: I'll improvise the website uh uh uh completely and also by the way I've integrated Arabic Arabic style this.

jacqueline ekumba: It's

Chethan reddy: So, I've integrated that as well. So, anyways guys,

jacqueline ekumba: necessary.

Chethan reddy: uh I'll revamp this. I'll build your ERP system, get back to you guys with some short demo videos and update it. But you have to get back to me as soon as possible right now with all the highly social uh all the social media I mean Facebook link if there are any. I think WhatsApp I have, Instagram I have and all the details all maximum stylist details everything. And Jacqueline you told me you do maintain some stuff in Excel sheet. Uh if you're not comfortable sharing the Excel sheets directly if you could yeah if

jacqueline ekumba: I can I'll send you

Chethan reddy: if you are okay sh send send me because that will help me to build the system uh very easily looking

jacqueline ekumba: properly.

Chethan reddy: uh looking at those numbers. Okay. I'm going to cook some something tonight and tomorrow and get back to you guys on Monday but you have to get back to me with the

00:53:49

jacqueline ekumba: Yeah,

Chethan reddy: information right now in next sometime so that I I can start with uh this thing.

jacqueline ekumba: one more question. A and this question affects affects affect me in a way.

Chethan reddy: Yeah.

jacqueline ekumba: Um, the question is directed to you and Mr. So, currently every stylist has a social media page. While they're trying to optimize and make bookings within their pages, the While they're trying to optimize and make bookings within their pages, I would want the the the reception because currently our reception is doing nothing. Um,

Chethan reddy: Don't worry.

jacqueline ekumba: appointment,

Chethan reddy: We'll

jacqueline ekumba: let me explain. Yeah.

Chethan reddy: start.

jacqueline ekumba: appointment management from. So let's say a client saw a style on a stylist social media and they want to book. The receptionist needs to have that booking in the system.

Chethan reddy: Understood. Yep.

jacqueline ekumba: But how can we do that? Because currently they overwhelmed with responding to their messages,

Chethan reddy: Correct.

jacqueline ekumba: booking and scheduling this and that.

00:55:01

jacqueline ekumba: This needs to be all under one roof because it still feels like they're working for themselves and that's a management

Chethan reddy: Got it. Make sense.

Rachel W: And that's a that's a management problem. Yeah. So you need to tell your stylist if they're posting something,

jacqueline ekumba: problem.

Rachel W: they need to also post with the Alkasa. They can do a collaboration post because you're mostly on on Instagram and Tik Tok.

Chethan reddy: Cut

Rachel W: Ask them to do

jacqueline ekumba: So now here's another disconnect. So we have one stylist who's worked for like eight years in Dubai.

Chethan reddy: it.

jacqueline ekumba: She has her own brand by the name Glow by Rahina. Glow with Rahina something like that. She has her watermark and logo in her stuff which is okay. She cannot I don't know if she So one of the things that I I did a social monitor on their individual pages. None of them says I work here or this is my office. It's just my name.

00:55:54

jacqueline ekumba: Um, so it's just their image, their name and what they provide and their personal number. No one is they're coming from a point where their previous bosses did not encourage them to feel like they belong. So it's like one leg in, one leg out, you know, it doesn't look professional. How do I make them see that it looks really bad?

Chethan reddy: H.

jacqueline ekumba: Because they don't see it from their eyes. They don't see it. None of my staff clearly states my name is gifts or

Chethan reddy: Oh,

jacqueline ekumba: Jacqueline um location caser sha saloon contact number booking did none of that none of them has that it's like you having your LinkedIn account without where you are you understand it's like your your years of experience and not being

Chethan reddy: got it. Got it.

jacqueline ekumba: like it's not done in a professional way how do I move how How do I tackle that? I can't.

Chethan reddy: No, we can't.

jacqueline ekumba: So,

Chethan reddy: We

jacqueline ekumba: you see, she's telling me that I can't I can't tackle that.

00:56:59

jacqueline ekumba: But how do I move?

Chethan reddy: can't.

jacqueline ekumba: So, one of the things that I' I'd want as solution would be they have a booking gotten on their social platform, but it needs to be on the main booking so that it's counted as a

Chethan reddy: Exactly.

jacqueline ekumba: sales

Chethan reddy: Correct. Correct. That's what we we have to force it to go to every single operation that is happening. Jacqueline let it be a private stylist someone or v going it should travel through information should travel through our platform so that we can capture it the most and keep it for us we can we can definitely do that but

jacqueline ekumba: Exactly.

Chethan reddy: as long as we have system in place that system has to

Rachel W: And they have to follow the system.

jacqueline ekumba: Okay.

Rachel W: And they have to follow the system. Maybe you need to do new contracts that have a line that says you have to while you're working here, you have to do this. When you leave, remove it. It's a very simple add and drop thing.

00:57:47

Chethan reddy: Just

Rachel W: So that you're saying no customer is coming here. That is private.

Chethan reddy: stop.

Rachel W: If the customer comes at 3 p.m. and their name is not in the reception system at 3 p.m. then yes, of course, you can treat them as a walk in now they're not a they're not a previous booking now. Now they're a walk in and you have and now the receptionist has to put them in as a walk in.

jacqueline ekumba: Yeah.

Rachel W: That's the only way you'll do it because if you can't force people to share their social media pages. That's one thing you cannot force them. But if it's in the contract, then they have to they have to agree to all the terms of the contract. Yeah, I will be showing up at work.

Chethan reddy: Got

Rachel W: I will respect the values. I will do this.

Chethan reddy: it.

Rachel W: And um if I have a private page when we do posts that I I am working, if I'm braiding hair at Alcaser and I'm posting that hair that I've done at Alcaser, then it has to be a collaborative post.

00:58:40

Rachel W: But the easiest way to do it is to make sure they're caught at reception because it's the reception that people come into, right? So if they come to reception and say I have a booking with let's say gift and G and the receptionist looks at

jacqueline ekumba: Mhm.

Rachel W: the computer and does not see any booking. They'll say okay cool let me write you down as a walk in. So they say at 3 p.m. someone walked in this person is free they are seeing someone. If this person is not free because someone has booked online, then they'll be given to somebody else who is free or they'll wait until this person is not free anymore, is not busy anymore. So that's that's I think that's a management thing. I think I don't think it can do much for you there.

jacqueline ekumba: No, but I think have a system that makes us

Rachel W: Yeah. And he said he'll do that.

jacqueline ekumba: align.

Rachel W: Now the thing so systems are okay. systems can be there but it's the implementation that's where it needs a personal person because the system can be there but if you're not using the system is there but it's not being used.

00:59:41

Rachel W: So what can Alcasta do in terms of management to ensure that and that's at the

Chethan reddy: Yeah.

Rachel W: reception. So if anyone comes in the first person they meet the reception they look for their booking cuz even sometimes I pop into this barber shop and I've not done a booking they will look and they will be like I don't see your name.

jacqueline ekumba: Yeah.

Rachel W: So they put me down as a walk in and they will put give me to whomever is

jacqueline ekumba: Not whoever I

Rachel W: available. No, not whoever you want.

jacqueline ekumba: want.

Rachel W: But if whoever you want is your insistence I want Jaclyn to do my hair. You wait until Jacine is free in the system and then you'll add them there as a walk

jacqueline ekumba: Okay.

Rachel W: in. It's the easiest way to do it.

Chethan reddy: Oh yeah,

jacqueline ekumba: Gotcha.

Chethan reddy: got it. No. U cool. These are all good problems to have. uh but I would say let's get the system in place uh uh first so that we see how are we actually what are the blockers that we are not able to use the system uh from we'll update it accordingly as much as possible then we'll get to know that if it's a uh IT problem or a management uh uh problem at all uh if we have the system in place but yeah um this is much clearer I think the scope is uh very very Good.

01:01:01

Chethan reddy: Uh let's get on to it. Booking, product management, uh one place, ERP, everything on another place. So there would be multiple roles here. I think uh super admin, admin and staff, different kinds of roles that would be acting. So, it's a full-fledged management system that we want to

automate at least most of our business so that we can scale. That's what I see from Jacqueline's uh uh vision. But anyway, we'll get started first. To get started, I need a tons of information from you guys uh with all all things that we have discussed. Once that is done, I'm going to share the initial uh website, customerfacing website and your dashboard website so that you guys can run through sit for some time. Give me a detailed feedback again and this loop go this loop goes on till we have achieved a

jacqueline ekumba: Okay.

Chethan reddy: very decent uh product and the number of loops should be very very fast. We might be doing it in like just one two days or 3 days max things like that.

01:02:17

Chethan reddy: So that we we'll have it in next couple of weeks ready. Good. So my job is to pull out the systems and take your feedback and improve the system as quick as possible. Cool. So whole thing I want to see whatever software product I'm trying to build I want to see it bringing a ton of value and uh streamlining your workflows. That's what I want to really see how it goes. So, let me get on that. Having a very good uh uh user experience of the product. Okay.

jacqueline ekumba: Perfect. Okay.

Chethan reddy: Um that's and uh I'll I'll share all the other details uh

jacqueline ekumba: Thank you so much.

Chethan reddy: with the scribe desk by today or tomorrow. Max uh Oh, I lost you Jacqueline. Oops. Is it me or uh we lost

Rachel W: No, it's not you.

Chethan reddy: that?

jacqueline ekumba: Yeah, computer went off.

Rachel W: It's not you.

jacqueline ekumba: My computer went off. I'm here.

Chethan reddy: Oh s***.

01:03:21

Chethan reddy: s***. Okay.

Rachel W: Your internet is very fast. Right.

Chethan reddy: Okay.

jacqueline ekumba: I know, right? I play the fastest.

Chethan reddy: No.

jacqueline ekumba: Okay,

Chethan reddy: Uh I I want Yeah.

jacqueline ekumba: I think that's it, right?

Chethan reddy: I wanted to talk to you for uh one two minutes more if

jacqueline ekumba: Yeah. Thank you, Gifty. Thank you, Miss Ray,

Chethan reddy: uh

jacqueline ekumba: for for joining us today.

Rachel W: Thank you. Thank you as well.

jacqueline ekumba: See you on the next one.

Rachel W: Bye.

jacqueline ekumba: and we appreciate you.

Qasr: Thank you.

Chethan reddy: thanks.

Qasr: You're welcome.

Chethan reddy: Thanks.

jacqueline ekumba: Bye.

Chethan reddy: Bye. Just a second. All right.

jacqueline ekumba: Okay,

Chethan reddy: All right. Cool.

jacqueline ekumba: tell me now.

Chethan reddy: No, no, no. Thank you very much for pulling all of the people in the call. I'm I'm I really wanted such kind of interaction so that I'm really clear with what we're trying to build.

01:04:12

Chethan reddy: The requirements are sorry uh the requirements are beautifully clear now. Uh we can get started on the implementation. I'll do it probably today itself uh and get the sites up by tomorrow. To be honest,

jacqueline ekumba: Okay.

Chethan reddy: I'm so I'm so mad about this at at this point. So I I'll wrap it up.

jacqueline ekumba: Okay.

Chethan reddy: And uh let's see see the main thing I want to understand is uh uh Jacqueline how is your business running currently with respect to salon is it good bad what is the projection of it how what is it like are you generating good amount

jacqueline ekumba: So,

Chethan reddy: of

jacqueline ekumba: I started very low. I'll use I'll put numbers in place. My first monthly sale was about 20,000. Then I had a high of 78 no 80,000. Then it went down to 78,000.

Chethan reddy: Second month

jacqueline ekumba: Currently, no no second month. So it went gradually 20 30 40 80.

Chethan reddy: itself.

jacqueline ekumba: Now we are at last month we had se last month we had 69 or 70,000 I have the financials somewhere I can share all this with you so is the business doing well right now the answer is no because the sales are very less because currently 80% of that figure goes to

01:05:34

Chethan reddy: Was

jacqueline ekumba: salaries and expenses I'm not withdrawing but is there potential for me to withdraw a huge potential.

Chethan reddy: there any month where you were able to

jacqueline ekumba: The none I've never taken and and the worst part the the

Chethan reddy: withdraw?

jacqueline ekumba: the worst part is I didn't use personal funds for the investment. I use Kufi's funds for the investment.

Chethan reddy: You're still putting

jacqueline ekumba: Uh I stopped.

Chethan reddy: money.

jacqueline ekumba: So currently no the last this month I had to put rent. The next rent is in August. I'm still putting in money because we do not have running costs.

Chethan reddy: Got it. So, are you at least able to make ROI? No. Right.

jacqueline ekumba: Not yet.

Chethan reddy: Got

jacqueline ekumba: But I know I think one of the reasons why we are not okay is because of the

Chethan reddy: it.

jacqueline ekumba: geopolitical issues we had.

Chethan reddy: Correct.

jacqueline ekumba: Because a huge number of our clientele are on unpaid leave out of the country. They were sent home.

01:06:42

Chethan reddy: How how many months did it

jacqueline ekumba: But once they back

Chethan reddy: started?

jacqueline ekumba: four,

Chethan reddy: Four months. Okay. Cool. Then there is there's nothing to comment on the business yet because it's it just got started

jacqueline ekumba: yeah, currently it's a low it's a low season. It's a very low season, but I know that the business has a very huge potential.

Chethan reddy: and

jacqueline ekumba: If I have working systems in place, if we can introduce the online booking systems where people can book for home services, not even to come into the house, the same way Nura is doing will win.

Chethan reddy: home services.

jacqueline ekumba: Yeah.

Chethan reddy: Got it. No, no, Jack.

jacqueline ekumba: So,

Chethan reddy: Uh, one question.

jacqueline ekumba: yeah.

Chethan reddy: When would the situation be better? I think now it is stable a bit, right?

jacqueline ekumba: So, they've signed agreements,

Chethan reddy: The war has ended.

jacqueline ekumba: they've signed peace treaties and whatnot. We are just waiting for people to start coming back.

Chethan reddy: Any approximate estimation from your observations that

01:07:40

jacqueline ekumba: I think in two months.

Chethan reddy: when

jacqueline ekumba: I think in two months by September.

Chethan reddy: and you you should be able to see some numbers growing in within two months after this. Okay. Not yet. Not yet. All right, Jacqueline. Uh cool. Uh so I have understood completely with respect to commercials. uh um let's not not even talk about a single aid at the moment I I don't even care let's build a product okay let's see how it is scaling the business how this the sales are coming in and all that stuff once we have data on the computer into a software beautiful software system we should get insights automatically what day which month which week blah blah blah we can answer

jacqueline ekumba: Oops.

Chethan reddy: hundreds of questions with that data so let's get in that data first let's have the systems in place let's automate it and let's see how uh this particular software helped you to scale and then we can talk about commercials once you are into certain level of profitability.

01:08:39

Chethan reddy: Okay, till then I'm not going to anything but I'm really passionate about building a beautiful product for you uh on

jacqueline ekumba: Yeah.

Chethan reddy: this. Okay, let's see how it goes.

jacqueline ekumba: Yeah.

Chethan reddy: Um so what is the uh what is the amount that you have to hit as a revenue to make sure that uh you make a very little

jacqueline ekumba: Um, so I think I'm not going to wait for me to reach I'm not sure what size, but the minute I can reach a 100,000 monthly, I know that I'm allocating 40,000 to salaries. 60 is what is left. 20,000 to expenses. The rest should be my dividends. must be my dividends because I use Sharesa's school fees to start the business knowing that it will give me returns unfort and and right now I'm bankrupt. My accounts are on negative for real

Chethan reddy: I miss

jacqueline ekumba: but I know that if I can start earning well I will remove my dividends if there's

Chethan reddy: her.

jacqueline ekumba: a capital injection that is required anywhere I know what to do and how to do it in order for us to grow.

01:09:47

jacqueline ekumba: I've I've visited different facilities to see what they are doing and how they're doing it. I just need to invest in two staff who can do lashes and nails because on those departments we are failing. Right where we live at the building complex downstairs we have a saloon that does plainly nails and lashes. Their monthly revenue is 150. They don't do hair. So, look at the revenue I'm getting from hair without nails and lashes. Imagine what I can do if I introduce those two. A lot

Chethan reddy: beautiful no this is more than enough this is what I actually wanted to talk uh super buddy I I'll get back with um solution with all I I'll share you the

jacqueline ekumba: please

Chethan reddy: details of describe test and all uh in in one two days

jacqueline ekumba: share share the first part. The the first thing I'm doing, I have a nephew who is a doctor.

Chethan reddy: smack.

jacqueline ekumba: He will share within his doctor groups in Kenya first. One of my deskmates is now a a gynecologist.

01:10:53

jacqueline ekumba: I talked to him already. He said, "Share with me the product." But my fear is I do not want an African to go and replicate the same thing.

Chethan reddy: See main the main problem is uh uh Jacking anyone can replicate but the reliability trust that we have to build is what is going to make business anyone can replicate who how many people are doing salon business in

jacqueline ekumba: Ah,

Chethan reddy: Dubai

jacqueline ekumba: so many not all of them are winning.

Chethan reddy: not all of them are winning right yeah so getting into winning will take time and it'll

jacqueline ekumba: Yeah.

Chethan reddy: it'll definitely you have to wait patiently But any which way the whole reason why I'm putting time on our uh salon solutioning software is that I do also see a lot of potential in this to be honest.

jacqueline ekumba: Thank you.

Chethan reddy: Uh no because

jacqueline ekumba: Thank you for those encouraging words. I love Mr. Cheta.

Chethan reddy: uh this services uh this services AI has come up

jacqueline ekumba: He's the best.

Chethan reddy: Jacine it is taking most of the data analyst finances all these jobs are b***** now they're gone almost gone the only business where AI cannot take is doing hair stuff and all do but

01:12:10

jacqueline ekumba: For real. For real.

Chethan reddy: we can build systems to scale such businesses to give people a feeling that they are taking premium services.

jacqueline ekumba: Yeah.

Chethan reddy: Even though the service is a nominal service, we can make it ultra premium just showcasing things on internet what we are doing, the systems we have, even a small PDF for a message that we send to them from our salon. It should feel that okay, they have a very premium way of handling us. you know, we should also send links like, "Hey,

jacqueline ekumba: Mhm.

Chethan reddy: can you please give feedback or so many things? I'm not a great business guy with that, but I'm trying to say. But let's see. Let's see. My target is I want to make this software stable within a month and post next month by end of this year, we should be in a position that okay, this is superb. This this solution helped her to scale the salon." And at that point, I want to see how commercials work out.

01:13:07

Chethan reddy: Okay.

jacqueline ekumba: Mhm.

Chethan reddy: End of the

jacqueline ekumba: So,

Chethan reddy: year.

jacqueline ekumba: I need uh my dad will have his neurologist consultation um end of the month. I want his neurologist to get on scribe desk as well.

Chethan reddy: Beautiful. Let me let me I'll share you. Just give me one two days time max.

jacqueline ekumba: No worries. No worries.

Chethan reddy: Most definitely.

jacqueline ekumba: Prepare everything in order.

Chethan reddy: Superb. All right, Jacqueline.

jacqueline ekumba: Thank you so much.

Chethan reddy: Let's pray for God that some miracle happens.

jacqueline ekumba: Abs. No, no, no. It will happen. It has to happen. We we we we are going to win 2026. We are left with a very critical period, but this is the defining period. Trust me.

Chethan reddy: Definitely. Sure. Thanks. Thanks for that uh support from your side. All right. Cool, buddy. I'll see you then. I'll get back to you with Please ask your stuff to send details as soon as

jacqueline ekumba: Thank you.

Chethan reddy: possible.

jacqueline ekumba: I'm calling her right away.

Chethan reddy: Bye.

jacqueline ekumba: Thank you. Bye. Bye.
